

Tunku Abdul Rahman University of Management and Technology
BMIT2073 Mobile Application Development
Assignment
Academic Session: 202605

Group:

Group of 2 to 4 members

Weighting towards the assignment:

Total: 100% (This assignment contributes 50% to the final coursework marks)

Submission Deadline:

Prototyping Presentation : Week 6
Submission : End of Week 12
Final Presentation : Weeks 13 and 14

Learning Outcome Being Assessed:

- CLO2: Apply mobile technologies and development methods to solve a given problem. (P4, PLO3)
CLO3: Present a mobile application to be published in a team. (A2, PLO4)

Scenario:

The Malaysian government's open data initiative, known as the Public Sector Open Data Program (DTSA), is led by the Malaysian Administrative Modernisation and Management Planning Unit (MAMPU). It provides the public, researchers, and businesses with free access to government datasets to improve transparency and spur digital innovation.

Key Initiatives & Portals

1. data.gov.my
Malaysia's central open data portal. It hosts thousands of highly granular datasets from hundreds of agencies, ministers, and state governments. The portal includes interactive dashboards and developer-friendly API access.
2. OpenDOSM NextGen
Managed by the Department of Statistics Malaysia (DOSM). It serves as a modern, high-performance platform visualising official economic, demographic, and social statistics.

Find out more here:

1. <https://data.gov.my/>
2. <https://www.mysa.gov.my/open-government-data/>
3. <https://data.worldbank.org/country/malaysia>

Assignment Task

Design, develop, and deploy a mobile solution that utilises real-time or static data from the Malaysian Government's open data platform to support SDG 9: Industry, Innovation, and Infrastructure.

SDG 9 aims to build resilient infrastructure, promote inclusive and sustainable industrialisation, and foster innovation. In Malaysia, this translates into improving public transport network efficiencies, optimising industrial hubs, and broadening digital connectivity access.

Deliverables:**A) Prototype presentation:**

Create a prototype of your app and present it to your tutor. Prepare a 10-minute presentation. Your presentation slides should be at most 10 slides. Your presentation should include the following items:

1. Title of app
2. Introduction
3. Problem(s) and solution(s)
4. Navigation structure chart
5. Screen design
6. Conclusion

Submit your presentation slides (soft copy) to your tutor or via Google Classroom. All members must participate in the presentation.

B) Final Presentation:

Complete the assignment and present it to your tutor. Prepare a 20 to 40-minute presentation (about 10 minutes per member). Your presentation should include the following:

1. Introduction
2. Live demo of your mobile app
3. Structured Code Walkthrough. Each member shall be responsible for presenting their own module. Attendance for the final presentation is compulsory.

Submit the following items to your tutor:

1. Each Team (submitted by team lead) - a ZIP file containing the following items:

No	Deliverable	File Format	Requirements
1	A presentation slide containing all The mobile app's main screens.	PDF	<Programme Code+Group>_<Team Lead Name>_Presentation E.g. RSD2S1G5_Peter_Presentation
2	A link to a private GitHub repository containing the complete mobile project.	Flutter Project Folder	The repository must show active contributions from all group members. Important: Remove all comments from the codebase.
3	Appendix A: Coursework declaration form	PDF	<Programme Code+Group>_<Team Lead Name>_AppendixA E.g. E.g. RSD2S1G5_Peter_AppendixA
4	Appendix B: Assignment evaluation form	Excel	<Programme Code+Group>_<Team Lead Name>_AppendixB E.g. E.g. RSD2S1G5_Peter_AppendixB

File name format: <Programme Code_Group>_<Team Lead Name>

E.g. RSD2S2G5_Peter

2. Each Member should submit the following files:

No	Deliverable	File Format	File Name Format
1	Appendix C: Peer evaluation form	PDF	<Programme Code+Group>_<Team Lead Name>_<Your Name>_ AppendixC E.g. RSD2S1G5_Peter_Alice_AppendixC
2	Appendix D: Task description	PDF	<Programme Code+Group>_<Team Lead Name>_<Your Name>_ AppendixD E.g. RSD2S1G5_Peter_Alice_AppendixD

Assessment Criteria:

Assessment Criteria			
CLO	Components	Criteria	Marks
CLO2	Individual	Quantity of work	15
		Quality of work	15
		Data management	15
		Originality and understanding	35
CLO3	Group	Quality of the team solution	5
		Quality of presentation	5
	Individual	Completeness	5
		Teamwork	5
Total			100

Note: Refer to the assignment evaluation form for more information.

Use of Artificial Intelligence:

Green (AI-Supported): AI is encouraged for brainstorming, outlining, and tutoring, subject to the requirements of the assigned task. In this course, AI is recognised as a collaborative learning tool. Students are encouraged to utilise AI tools to support activities such as coding or refining written work. Students' understanding of data structures, algorithms, and architecture is essential.

All AI use must be explicitly disclosed. Students are required to include an **AI Disclosure Statement (Appendix A)** with each submission, specifying the AI tools and prompts used, as well as the steps taken to verify the accuracy and relevance of the AI-generated content. Students remain fully responsible for the accuracy, logic, and integrity of their final work.

Please refer to the TAR UMT artificial intelligence (AI) guidelines for students.

Sustainable Development Goal:

This coursework fulfils the requirements of SDG 9 (Industry, Innovation, and Infrastructure).

Plagiarism Policy:

Submitting the coursework means you have agreed that your work is original and complies with the rules and regulations. Plagiarism is a serious academic offence. If the students' work is detected as plagiarised from any source, the students' coursework marks will be downgraded to zero marks (0 marks).

Late Submission:

Please refer to the TAR UMT guideline on late submission of coursework for more details.
